

GUIDE

Instagram and Hootsuite

A Quick Start Guide

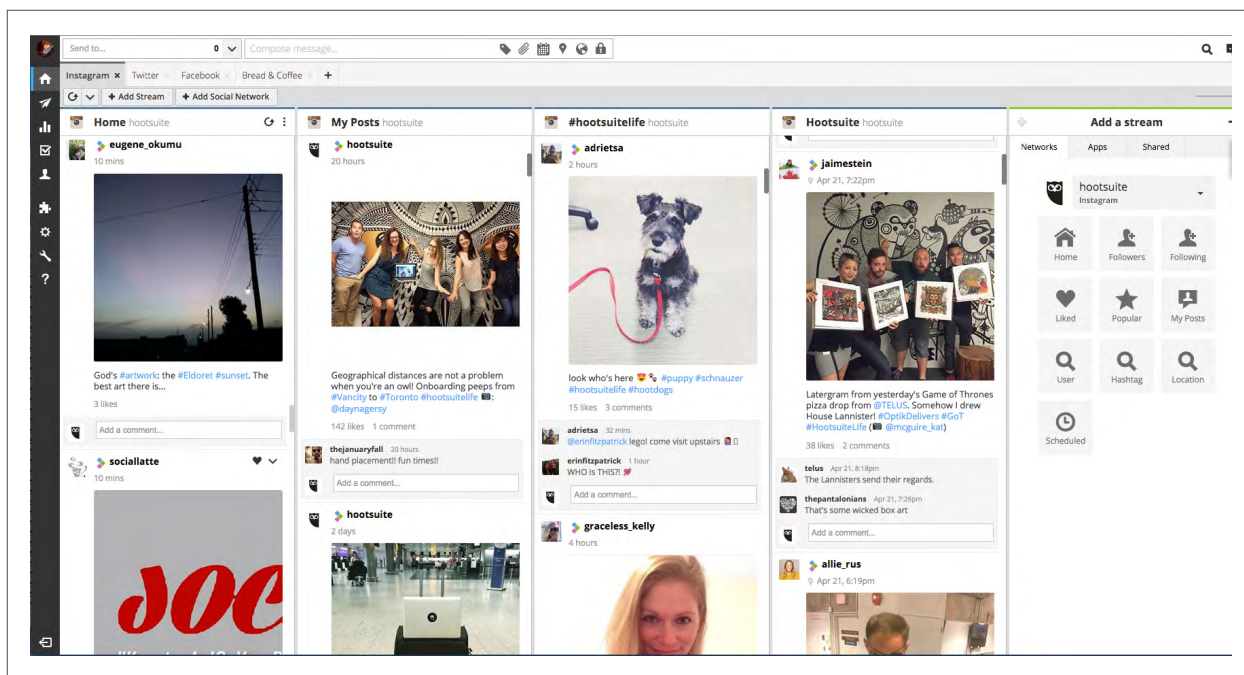

A Quick Start Guide

Also, if multiple people contribute to your business's Instagram strategy, you can securely share access across teams without sharing passwords for easy collaboration with Team Members. (Team Members are given access to Instagram by administrators, so they are not required to connect the social network.)

INSTAGRAM AND HOOTSUITE: A QUICK START GUIDE

Connect Instagram to Hootsuite

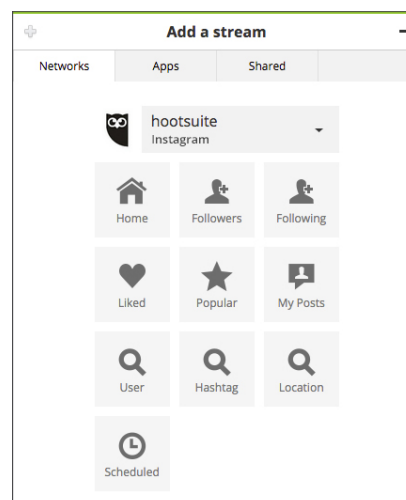

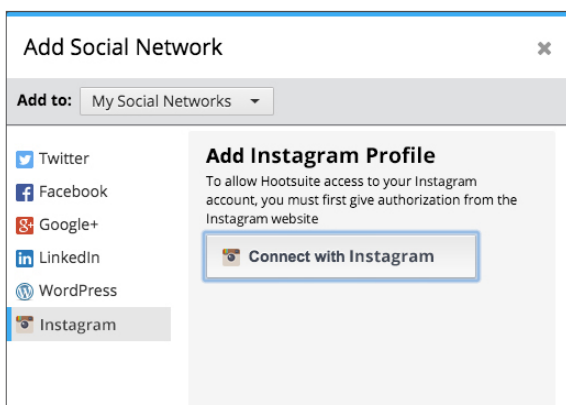

First step: Make sure you have signed up for a free Instagram account before you log in to Hootsuite.

Add Instagram to your Hootsuite web dashboard

1. To add an Instagram account to your Hootsuite dashboard, first click on your **Profile Icon** in the launch menu and then **Add a Social Network**.
3. Pick the **Tab** you want to work with—or create a new one—using the **Add a Stream Wizard** select your Instagram profile from the drop down.

2. In the pop-up window, select **Instagram** and press **Connect with Instagram**. Enter your credentials and authorize Hootsuite to access your account.

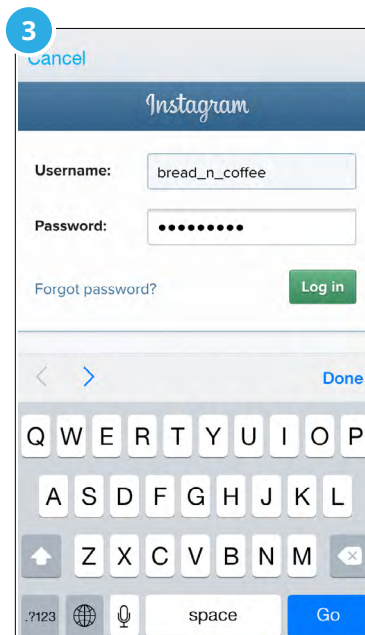

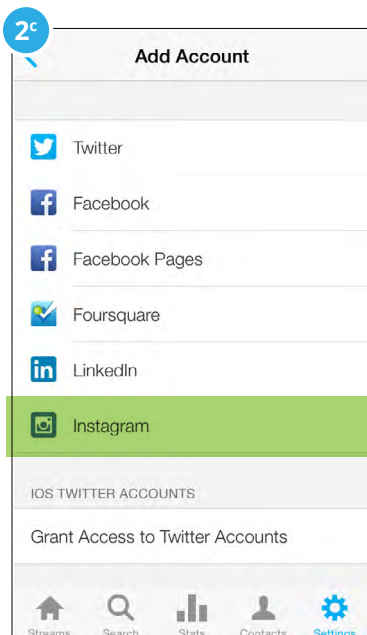

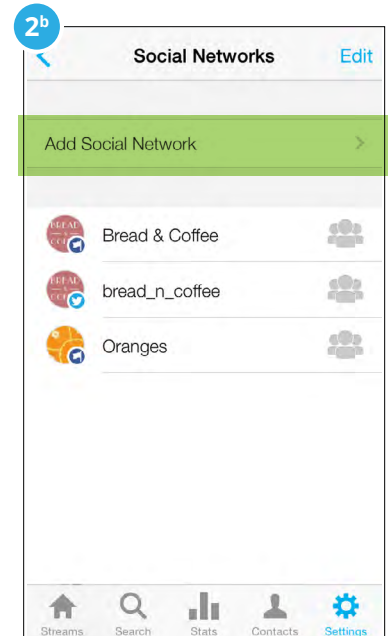

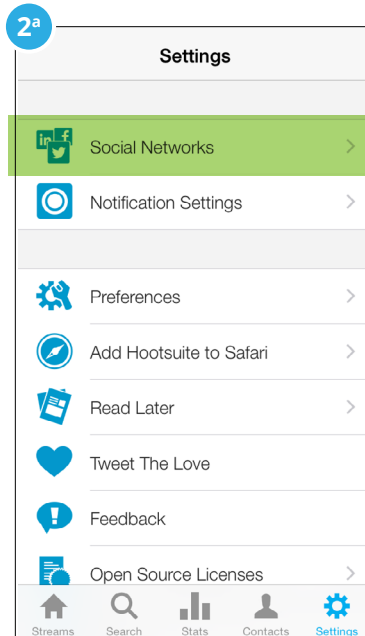

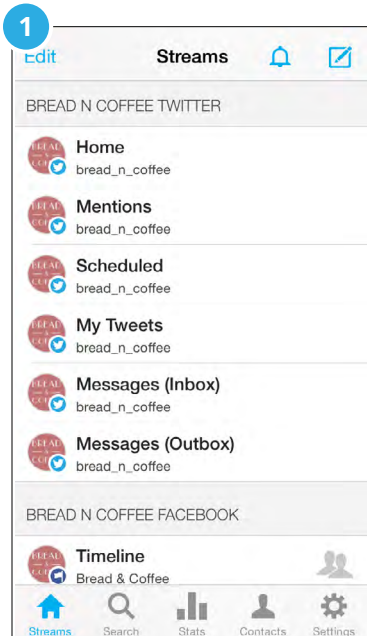

Add Instagram to your Hootsuite mobile dashboard (iOS and Android):

1. Navigate to Settings.
2. In Settings click **Social Network (a)** and then click **Add Social Network (b)** and select **Instagram (c)**.
3. Enter login credentials and authorize Hootsuite to gain access.
4. You will be auto-subscribed to push notifications.

If push notifications are disabled for the Hootsuite mobile app, you must enable your notifications within your mobile phone's settings.

Schedule and send Instagram images from Hootsuite (web and mobile)

1. Choose your Instagram account from the **Profile Picker**.

2. You can then compose your message—which will act as the caption for your Instagram photo (hashtags and emoji are fully supported)—and attach your image in the **Compose Message Box**.

3. If you want to publish right away, click **Send Now**. If you wish to schedule your post, select a later date and time and click **Schedule**.

4. When your message is ready to be published, you will receive a push notification from the Hootsuite mobile app directing you to the Notification Center.
Note: Push notifications must be enabled and turned on to publish to Instagram.

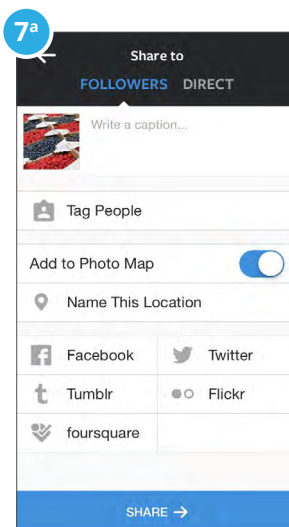

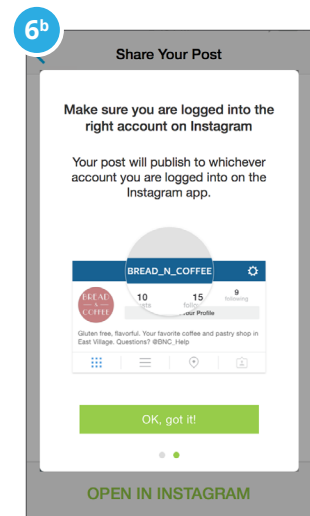

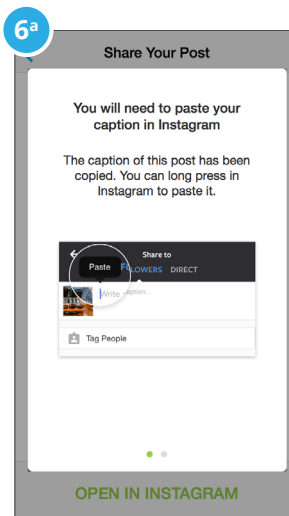

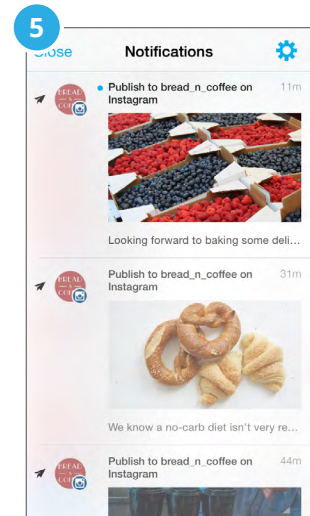

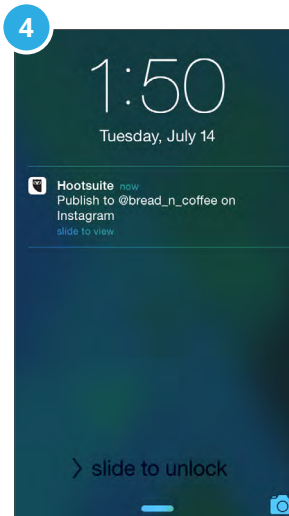

5. In the Notification Center, tap the post you want to publish.

6. When viewing the post, tap **Open in Instagram** to direct your image to the Instagram app. The Hootsuite mobile app will automatically copy the caption (text, hashtag, and emojis) to your device's clipboard, allowing you to easily paste the caption once in Instagram (a).

Note: It's important that you're signed into the correct Instagram account prior to tapping **Open in Instagram (b)**. If you are an iOS user, you will be prompted to select the Instagram app.

7. Once in the Instagram app, tap into the caption box (a). Tap again and select Paste to insert your caption (b). Within the "Share to" screen, you can also add user and location tags.

8. Finally, tap **Share** to publish your image to your Instagram account.

Collaborate with Team Members

With Hootsuite, you can securely set up team workflows for assignments and approvals (note: approvals are only available with Hootsuite Enterprise), and create multiple search streams for at-a-glance monitoring. For example, set up a stream in Hootsuite to monitor your brand's hashtag. It's easy to assign different tasks—such as routing contest entries on a specific hashtag to your community team, allowing them to thank customers for entering. This saves time while providing a secure way to share Instagram access with team members.

Employees and influencers can be excellent resources for your brand's story. With Hootsuite Enterprise, team permissions allow influencers, employees, and external agencies to easily contribute content. Once they submit their Instagram content, your brand team can approve for publishing.

Share access to Instagram (Pro and Enterprise only)

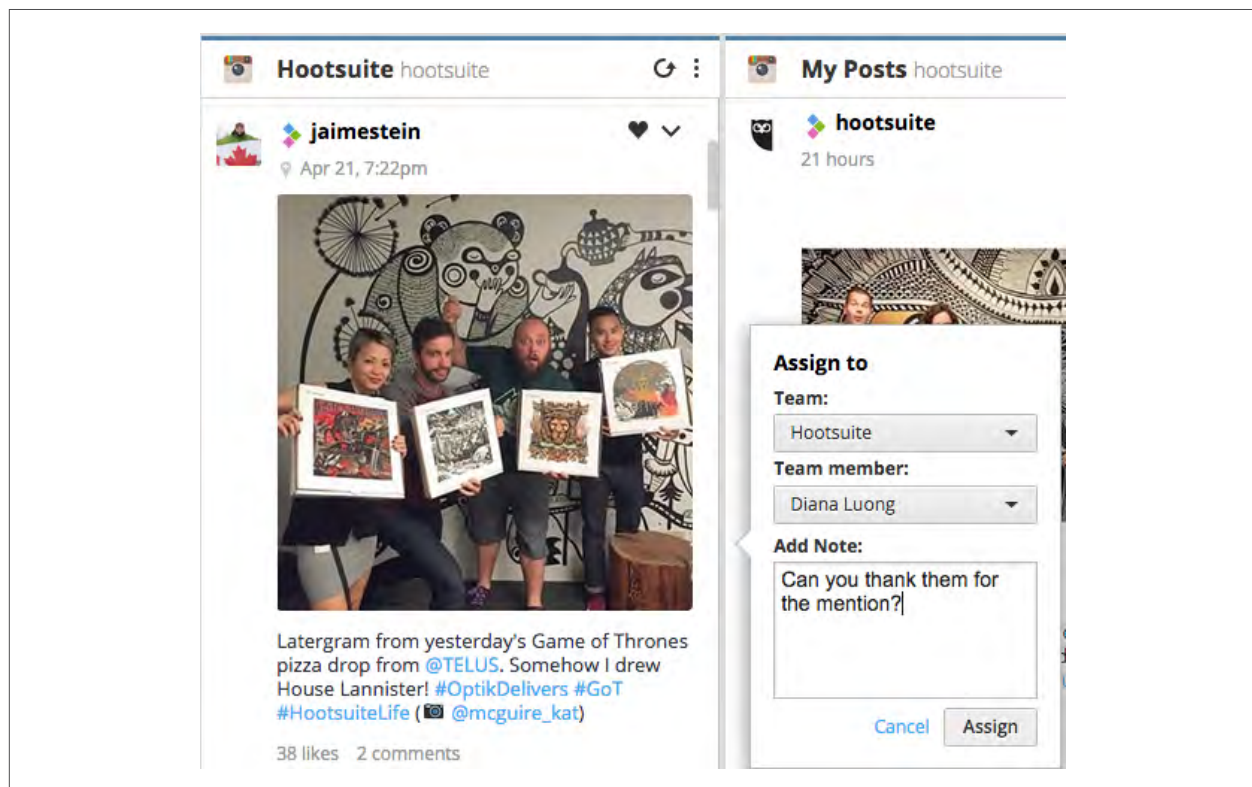

Hootsuite account Admins can securely share access to Instagram across Teams and Team Members. To learn how to set your Team's permission settings, [click here](#).

Assign image posts to Team Members (Pro and Enterprise only)

1. Click the  button in the top-right corner of the message you would like to address, and then select **Assign to**.
2. Select a team.
3. Select All Team Members or a specific team member.
4. Under **Add Note** enter a message for the assignee.
5. Select **Assign**.

Approve messages created by Team Members (Hootsuite Enterprise only)

Users with Limited access can submit Instagram content for approval by an Admin Team Member. Once a message is approved, it will appear within Publisher. To learn more about approving messages, [click here](#).

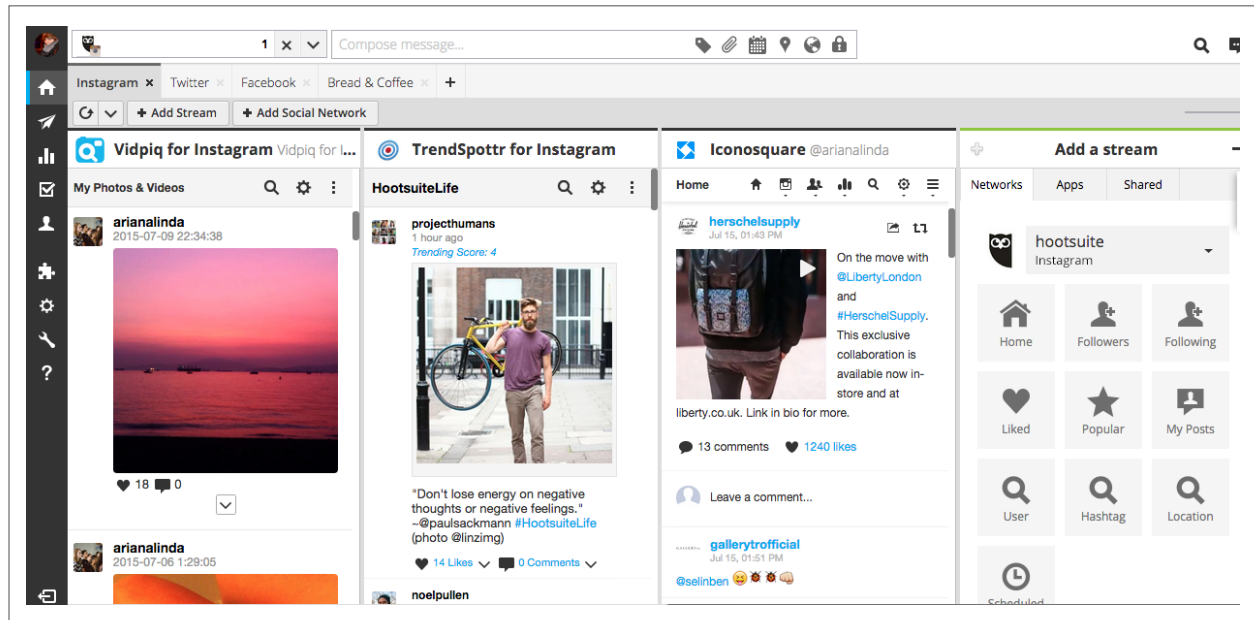

The screenshot displays the Hootsuite interface. On the left, a stream titled 'Hootsuite hootsuite' shows a post by user 'jaimestein' from April 21, 7:22pm. The post features a group of four people holding up framed drawings in front of a large, colorful mural. The caption reads: 'Latergram from yesterday's Game of Thrones pizza drop from @TELUS. Somehow I drew House Lannister! #OptikDelivers #GoT #HootsuiteLife (📷 @mcguire_kat)'. It has 38 likes and 2 comments. On the right, a stream titled 'My Posts hootsuite' shows a post from 21 hours ago. An 'Assign to' modal is open over this post, containing the following fields: 'Team:' with a dropdown menu showing 'Hootsuite'; 'Team member:' with a dropdown menu showing 'Diana Luong'; and 'Add Note:' with a text box containing 'Can you thank them for the mention?'. At the bottom of the modal are 'Cancel' and 'Assign' buttons.

Extend your Instagram management capabilities

Our additional Instagram apps in the Hootsuite App Directory extend your management capabilities by providing geo-located search, profile and engagement metrics, and trending content.

To learn how to add an app from the Hootsuite App Directory, check out this [Hootsuite Tip](#).

Add now

Vidpiq

Monitor posts on Instagram by location. The Vidpiq for Instagram app in Hootsuite allows you to monitor and engage with users that are posting in your area, or an area you choose to follow.

Add now

Iconosquare

Manage multiple Instagram accounts and browse your most important statistics. The Iconosquare app provides an efficient way to analyze monthly summary statistics, engagement metrics, and more.

Add now

TrendSpotttr

Find top trending photos, videos, and influencers for any tag or topic on Instagram. Discover what's trending in relation to your brand, industry, or campaign. Engage with key influencers, view trending hashtags, select from a list of popular tags and easily share trending posts to your social networks.

Log in to Hootsuite now and get started with Instagram
